Dear Mr. Espy,

Thank you for time. This letter of intent is a request for donations to assist in my '**Mission**' to

'Help Children To Read Beginning At The Age Of Three Years Old With Every Donation'

'Of what value can one person achieve to benefit oneself that benefits others in a positive direction that benefit others in society,' I asked myself this important question. I am an Independent Educator Contractor that looks forward to forming a much larger foundation. I have been working more than the last five years on educational materials with travels of traveling by bicycle and bicycle trailer over the last five years to promote/offer assistance to others in hopes for a better Life for all- knowledge and application of knowledge applied in written form.

As curriculum is updated for schools every year so is daycare & preschools (known as pre-K). Help assist the future through donation fund raising for additional creations of a new book product called 'Pre-Reader'. In addition, help assistance through donation fund raising in distribution of purchased donated paperback copies of the new products called 'Pre-Reader'. *Goal for donations this holiday season is to purchase through my publisher's discount complete sets to be donated to daycare/preschools and then throughout the year to continue to supply those daycare/preschools with paperback books with additional future new releases to be donated along with assisting in development costs. To make this happen donations are requested for funding the purchases and future purchases to donate 'Pre-Reader' paperback books and cover development costs. I look for donations to continue development in the creation of more prereader books, to complete additional educational materials with donations to be funding the donation of paperback books to be donated to church preschools and small-town libraries with limited government funding that include mobile library buses.*

'What are PreReader book products?'

A New Educational Product developed by Carol Lee Brunk (myself) to Help Children To Read Beginning At The Age Of Three Years Old-Prereader Paperback Books PreReader book products are designed as an assisted learning aide in word recognition and beginning comprehension through visual representation that includes sight words. The objective is to be able to read a complete sentence with comprehension and to understand a story in a sentence in a book. A story in a sentence and several sentences make a bigger story. Once a child knows the alphabet, he/she can read a book. The books are *not* flash card books or memorization flash card games. The books are total comprehension that include sight words with illustration and individual words for full sentence structure form to give meaning and/or understanding why it was important to learn the alphabet -the meaning of letters that become words that were combined to make the sentence in a story for comprehension.

Children Continue To Grow Even When The Economy Does Not Grow'

In regards to the economic station state of the U.S., there are areas in the following states I traveled where children are known to sit two hours a day on a bus each day to get to school-children that are bussed in from smaller surrounding towns to one larger town- Virginia, W. Virginia, Vermont, Kansas, Illinois, Indiana, Ohio, Kentucky. Churches are the first place many go to get a better Life. With educational materials not as plentiful, during my travels to smaller towns and communities while traveling on bicycle with bicycle trailer, a complimentary complete set of PreReaders **in pdf form only is donated** to many of the churches and families that include homeschooled children **until funds can assist in donating paperback books**. Children don't wait for the economy to get better. Children continue to grow even when the economy does not grow. Twelve

volumes of Prereaders are available on amazon in print paperback for look up under author's name in search button Carol Lee Brunk.
